

SELCA: Ultrasound Imaging

This Community of Practice (CoP) was created to bring together Ultrasound Imaging staff, offering space to share ideas and experiences, so we can influence improvement and support positive change in services across South East London.

Community of Practice events have so far been focused on sharing experiences and practices across the Ultrasound Network so that we can then find the best ways of working together to create ultrasound services that offer the most positive experiences possible for both patients and staff.

“
Opportunity to link up, communicate and share experiences, issues and solutions with people from other trusts is invaluable - giving a helpful insight into where I work.
”
