

CamAPS | FX

The hybrid closed-loop system that automatically adjusts insulin delivery on your insulin pump based on your sensor glucose readings.

CamAPS FX may be a good option for you if you are looking to improve your diabetes management.

Speak to your health care professional about whether this might benefit you.

Adaptive and personalised to you

Learns and adjusts according to your insulin needs, whilst giving you the freedom to change settings.

Runs on your smartphone*.

Compatible with the Android OS*.

Available for all ages

Approved for ages one year and over.

Comprehensively tested

Cambridge control algorithm tested in more than 15 clinical trials involving over 300 participants.

* CamAPS runs on an Android phone and is compatible with Android models supported by Dexcom.

*'This is absolutely AMAZING!!
All my dreams answered ... I'm
enjoying the diabetes holiday!'*

*'First time we as parents were
able to sleep the night straight
since diagnosis.'*
